OK. It took me three times of installing/uninstalling, but I finally got it working.

After I got it working I decided to help you guys out here but as I just said, I'm not typing this as I'm going through it so bear with me.

I'll translate the readme file into English. There are multiple Readme files, USE THE ONE in the main directory which is in the folder with crack, Update, and Acrobat_11.exe.

- 1.) Disconnect from internet
- 2.) Run Acrobat_11.exe
- 3.) Install as a trial, only add a name to user name (not your own idiot!) Leave organization blank, click next
- 4.) Choose how many features you want installed (I used typical because I only need it for editing PDFs), click next
- 5.) IF YOU ARE OFFLINE, it will show "Acrobat XI Pro Trial" at the top and show a big 30 days remaining. Click License this software.
- 6.) Open the keygen under Crack--> keygen [alternative only]--> keygen.exe and choose "Acrobat Pro X v 10.x" then generate your serial.

*****COPY AND PASTE SERIAL ON NOTEPAD!!! YOU NEED IT AGAIN*****
