About This Game

Nomad is a sandbox survival game. Hunt, craft, kill and survive! Find food, drink, weapons, ammo and medical supplies - or craft them! Build a base to protect yourself but also remember to protect the base from raiding players.

Explore

Set years after an apocalypse, the world is over grown, broken and abandoned. Explore the massive 2kmx2km island to find gear and loot to aid in your survival.

Survive

Survival is key. Hunt for food and drink across the island, or simply kill others for it. Scavenge for medical items to heal broken bones and deep wounds.

PVP

Find weapons and ammo and hunt down other players. Be that bloodthirsty bandito, or be a hero helping others - it's entirely up to you.

Base Building

Create your own bases by chopping down trees for wood. First create your foundation and snap walls, windows, doorways and ceilings to it. Add a door and lock it.. Place a workbench so that other players cannot build in the surrounding area. Make sure your workbench is hidden as other players can use it. Upgrade your wooden base to stone, by going out and mining with a pickaxe.

Farming

Find and collect packet of seeds around the world then use them to make your very own farm. Farming brings any benefits so make sure it's well protected.

Sleepers

We all have to sleep sometime. In Nomad, disconnected players will sleep on the floor so make sure you are in a safe, protected area when logging off.

Host your own servers

Host your own server directly in game or use the stand-a-lone server located at your Nomad Steam install directory.

all voiced by the same guy and is to lazy to add more detail than mario 64, yu put together the rest. Fallout meets choiced based story telling Part 1. In my playthrough romance was not there at all. And the dark tone to this was good. Epilogue was really the only thing I had a problem with since certain things happened that I didn't get to actually experience. Nice game when you are bored. Not sure about the other reviews on here - I purchased the car mainly for those white walled rims with the black spokes. Thought i would take the car out for a spin - ended up playing a bunch of games\mathbb{matches} comp and unranked with it.

Surprisingly nice car. I dont think it handles as bad as some people hhave mentioned, or maybe its just not me and i dont notice it. I am usually used to using the domnius, batmobile and the octane. The first thought was that it handles a bit similar in my opinion any how closely to the octance. If there are any die hard dominus users here - Try out the car and see how it feels. I will probably use this car every so often. I much like it and it was a pleasant surprise for me.. If you Just don't want to work for exp,money and just Customise your car and Do challenges i say this game is the one

just added Multiplayer option and it will be Perfection. Very good idea, bur AI and controls, to me, are poor. Extremely difficult to utilize game mechanics. The positives are this game has a nice protagonist and nice girls to date. Unlike many of these vn's he is not a fool. There is no\u2665

Very clunky interface, but before I got any further into the game I checked out the options menu and found a "data privacy" option? It has the unity analytics on by default (opt-out).

The dev can now analyze how quickly thereafter I hit "refund".

. Wonderful, colorful wallpapers that are definitely better than standard ones. I can advise this utility, especially since it is not expensive.. Okay, I didn't expect this game to be as fun as it looked. I enjoy the visual aesthetic, soundtrack is awesome and the gameplay against the AI can be surprisingly frenetic.. Magical Monster Land has the solid foundations to be a good casual Platformer, albeit a bit generic. Only two worlds (only the first is finished) are available at this time, running about an hour of playtime realistically. With that in mind, its hard to say where the game will go from here. There is a massive amount of work ahead for the single developer to complete and flesh out the five-world goal.

The game is similar to the SNES era Donkey Kong Country and Super Mario 2-D platformers. Although as of now the game plays more casual version of those. The weapon power ups do trivialize the enemies to a large extent, the strength of the playable character is vastly different without them. Keep in mind these earlier worlds are intended to easy. It's hard to say how the difficult curve will develop. Notably, the first boss is a step up in difficulty compared to everything else in the game and is welcome challenge.

I\u2019m happy to say the game works great with a Xbox-360 gamepad and I had zero problems getting it to work, and the controls can be rebound as desired.

I\u2019m excited to see how this game develops.

. Nomad one of the best zombie survival games.

Don't judge a game by it's graphics, Nomad is the game that deliver to you what you expect from any survival game with zombies:

- You can build your base.
- You can make friends.
- You can put on a server, and close conection (singleplayer), or not (multiplayer).
- You can craft a bow and hunt animals.
- You really should care about thirst and hunger, otherwise you'll die.
- Achievements.
- Guns!
- You can plant food inside your house (tomato, potato, carrot, etc.).
- Make a group and hunt people, grief houses, steal, destroy, murder and else.

Build your fortress, conquer, or simply try to survive.

This is THE game you expect, don't waste time with others.. Bought this and game doesnt even give you the cars.... thank you for being a worthless game.. Zibylon is a decent indie puzzler\space game. Though the graphics are built on a dated engine, I had a bit of fun with the game. I made it to level 3 and was a bit frustrated with how long this particular level was taking to solve. Your drone, which you use for the puzzle aspect of the game, moves quite slowly and level 3 is a LARGE level. Moving from one end to the other was just taking too much time.

The other aspect of the game - the planet rebuilding, is quite nice. The whole game has a little bit of that 'Planet Driller' vibe; very indie but well done.

I am, however, deciding to refund it as I think the price point is a little high for what Zibylon has to offer. But since you can always request a refund through Steam, I actually do recommend trying out Zibylon to see if it is a right game for you.. I love Psychonauts and am greatly looking forward to Psychonauts 2. I like the concept they've created of a VR point-and-click and using Clairvoyance instead of teleporting! Generally I think this is a cute, short game that has great voice acting and all your favourite characters, but a couple of issues prevent me from recommending it.

My main issue is that the game causes me vertigo in (at least) the menu sequence, opening credits, underwater sequence, and in the plane if you clairvoyance into the squirrel (I think? I can't remember what it is now - the animal up there). I've not actually completed the game yet, mainly because of that. I've been playing other games that don't make me feel ill.

Also, it's a little bit of an unpolished experience - I had to restart it a couple of times for reasons I've now forgotten and getting my seat exactly where the game was expecting me to be was a little tedious. The controls can be a little clunky and imperfectly explained during the tutorial.

I'd say get it if you're a fan of Psychonauts and point-and-click adventures, but if you're prone to feeling ill when you don't have a virtual ground beneath your virtual feet, vertigo or afraid of heights, probably leave it alone.
